NBN Key Facts Sheet: Fixed Wireless 400

Residential NBN Fixed Wireless

Beyond Broadband Group Pty Ltd (ABN 62 695 597 383) | November 2026

Speed tier: 400/40 Mbps. This is the maximum speed available during off-peak periods (11 pm to 7 pm the next day). It is not a guaranteed speed.

Typical busy-period speed: 210 Mbps download (12 Mbps upload), measured in the busy period (7 pm to 11 pm).

What this speed suits in the busy period: Several 4K streams, large downloads and many connected devices. Suits about 5 or more people using it at once.

If your connection can't support this speed tier: we'll tell you, and you can move free of charge to a plan it supports, or cancel without paying any remaining minimum-term charges.

Power failures. Your service will not work during a power failure.

Things at your premises that can slow your speed: Wi-Fi range and interference, antenna position, weather and terrain, an older router or device, and many devices in use at once. To help, use a modern router, place it centrally, and connect key devices by cable.

Medical and security alarms. Check whether your medical or security alarm will work with an NBN service, including by contacting your alarm provider.

Plan: Fixed Wireless 400, $119/month inc GST. Technology: NBN Fixed Wireless. Unlimited data and a static IP address included. Read with the Critical Information Summary. Questions: 07 3881 9606 or support@beyondbroadband.com.au.
